**Examiner's Comments**

Applicants' amendment and remarks filed November 19, 2007 have been received and entered into the application. In view thereof, all rejections have been overcome and thus are withdrawn.

***Request For Interference***

Applicants continued request for interference between the present application and Jennings, (U.S. Patent Application Publication No. 2004/0029941), remains of record as presented in a submission filed by Applicants on April 23, 2004.

Consideration of a potential interference has been considered. However, as set forth under MPEP § 2303:

"37 CFR 41.102. Completion of examination.

Before a contested case is initiated, except as the Board may otherwise authorize, for each involved application and patent:

- (a) Examination or reexamination must be completed, and
- (b) There must be at least one claim that:
  - (1) Is patentable but for a judgment in the contested case, and
  - (2) Would be involved in the contested case.

An interference should rarely be suggested until examination is completed on all other issues. Each pending claim must be allowed, finally rejected, or canceled. Any appeal from a final rejection must be completed, including any judicial review. Any petition must be decided", (emphasis added).

Here, examination of the Jennings application, U.S. Serial No. 10/429,474 has not been completed; each pending claim is not allowable; and thus, consideration of a potential interference is pre-mature and will thus not be here entertained.
